DETAILED ACTION

Terminal Disclaimer

The terminal disclaimer filed on July 27, 2004 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent Number 6,672,811 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Allowable Subject Matter

Claims 22-36 are allowed. The following is an examiner's statement of reasons for allowance: The claims are allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that of a threaded insert having a bushing portion and at least one key. The at least one key comprising a substantially longitudinal locking portion and a substantially longitudinally longitudinal tang portion, wherein the locking portion is connected to the tang portion.

Art Unit: 3676

Additionally, the tang portion has a first face and a second face being substantially parallel and having a curved profile.

U.S. Patent Number 4,895,485 to Guevara et al. discloses a threaded insert having a bushing portion with a threaded central bore and male threads on the external surface, and at least one key, wherein the at least one key has a longitudinal locking portion and longitudinal tang portion having a triangular cross section. However, Guevara et al. do not disclose the tang portion having a curved profile.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
